

APPHON/ROHPPA

Pediatric Chemotherapy/Biotherapy Administration Clinical Competency Checklist

Provider Name	Signature	
Work site	Supervisor Signature/initial	1

Competency statement: The Registered Nurse (RN) will assess the patient, educate the patient/ family, provide applicable physiological preparation, administer chemotherapy/ biotherapy, and provide post care in a safe and therapeutic manner, in accordance with APPHON/ROHPPA Pediatric Chemotherapy Administration Standards and Competencies.

The RN must have met the knowledge criteria and clinical competence before administering chemotherapy or biotherapy to a patient: http://www.apphon-rohppa.com/en/levels-care

Clinical competency must be initially verified by at least three supervised chemotherapy/biotherapy administrations. Additional supervised administrations may be required to ensure competency of the new learner. Clinical competency must be shown in the following aspects, reflective of the level of care the nurse will provide at his/her institution, and in keeping with local institutional policies. Supervision must be by a competent chemotherapy administration supervisor** using this APPHON chemotherapy/biotherapy administration clinical competency checklist. A Registered Nurse (RN) who will administer vesicants peripherally must have an additional initial supervision.

** Competent chemotherapy administration supervisor:

- a RN who has completed the APHON Pediatric Chemotherapy Biotherapy Provider course,
- and has demonstrated current clinical and knowledge competency based on the APPHON/ROHPPA Pediatric Chemotherapy Administration Standards and Competencies for Practice and Education,
- and has at least 2 years of chemotherapy administration experience.

Competency Criteria		Evaluating Supervisor
Assessment of patient prior to administration		
Ensures a recent history and physical has been completed by physician/NP prior to initiating therapy (as required by protocol and or change in status).		
Completes current nursing patient assessment prior to administration and reports any new or concerning findings.		
Confirms results of required blood work, tests, and imaging . Ensures physician(s) are aware of results.		
Assesses past history of side effects including hypersensitivities and allergy profile, as well as their management.		
Providing Patient/Caregiver Education	Date verified	Evaluating Supervisor

B. Peripheral IV Vesicant Administration Details				
Drug Date				
Understands the additional risks, prevention, and potential management of extravasation with PIV administration.				
Documents on the Medication Administration Record and roadmap				
Post Administration of Chemotherapy/Biotherapy Care	Date verified	Evaluating Supervisor		
Demonstrates ongoing assessment for post and delayed side effects/reactions				
Reports pertinent findings to physician and other team members in a timely manner				
Administer supportive/rescue medications and provide interventions to minimize side effects				
Provides ongoing education of patients/families of likely and potential side effects/prevention and management				
Ensures patient/family is aware of future treatment/symptom management plan.				
Ensures family is aware of future follow-up and treatment plans.				
Reports pertinent information to oncoming RN's about the therapy administration, tolerance and supportive care plan.				
Communicates relevant information with other health professionals involved in the care of this patient: completes permanent documentation of agent administration and supportive care (labs, history and physical, nursing assessment) faxes/files required documentation to shared care partners
